GitHub | LinkedIn | Portfolio

PROFILE

AI Engineer specializing in building multimodal AI systems and LLM-powered applications. Experienced in prompt engineering, LLM orchestration, and integrating speech, vision, and text models into scalable applications using Python, Flask, React, and AWS infrastructure. Comfortable working with AI-assisted development workflows using modern agent-based IDEs such as Antigravity and AI coding assistants integrated with VS Code.

WORK EXPERIENCE

AI Training Associate (Freelance) – iMerit | Remote | 2025 – Present

- Worked on the Nidra Image Preference Workflow (WF10) supporting AI training datasets.
- Performed image classification and preference tagging based on detailed client guidelines.
- Evaluated visual content and assigned ratings to ensure dataset consistency and quality.
- Used Ango annotation platform for tagging, search, and dataset labeling.
- Participated in guideline review sessions, training modules, and production readiness assessments.
- Maintained accurate productivity reporting via Worksuite timesheet tracking.

AI / Backend Developer (Freelance) – VIVLY OTT Platform | 2025 – Present

- Designed backend architecture for a cloud-based OTT streaming platform.
- Configured AWS infrastructure using EC2 for compute services and S3 for scalable media storage.
- Integrated CloudFront CDN for optimized global video distribution.
- Implemented adaptive HLS streaming pipeline for efficient playback across devices.
- Managed deployment, SSL configuration, and domain setup using cPanel hosting environment.

Data Science Intern – Feynn Labs | Remote | Jul 2024 – Sep 2024

- Developed analytical dashboards in Tableau and Excel for client reporting.
- Implemented RFM modelling to identify high-value customer segments.
- Managed datasets exceeding 50k records while maintaining data quality.

Python Developer Intern – Techplement | Remote | Jun 2024 – Jul 2024

- Automated Excel-based reporting tasks using Python.
- Integrated APIs to improve data processing workflows.

PROJECTS

Rem-AI – Local Multimodal AI Assistant (Python | Flask | React | Ollama | Whisper | LLaVA)

- Built a local-first multimodal AI assistant supporting text, voice, and image interactions.
- Implemented LLM orchestration using Ollama with Dolphin-Llama3 for conversational AI.

- Added vision capabilities using LLaVA for image understanding.
- Implemented RAG pipeline using web search for contextual responses.
- Developed ChatGPT-style React interface with streaming responses and Markdown rendering.

Nexoraid – AI Chat Companion App (Kotlin | Jetpack Compose | OpenRouter)

- Developed Android AI chat application with multiple AI personas.
- Implemented prompt engineering for role-based conversational flows.
- Integrated OpenRouter models for conversational AI.
- Added Text-to-Speech playback for AI responses.

STREAMFORGE – OTT Streaming Platform Infrastructure (AWS | EC2 | S3 | CloudFront | HLS)

- Designed cloud-based video streaming pipeline for OTT delivery.
- Configured AWS EC2 instances for backend services and media workflows.
- Implemented scalable media storage using AWS S3.
- Integrated AWS CloudFront CDN for optimized global content delivery.
- Built adaptive HLS streaming architecture for efficient playback.

TECHNICAL SKILLS

- **Programming:** Python, SQL
- **Frameworks:** Flask, Django, Streamlit
- **AI & LLM Systems:** Prompt Engineering, LLM Orchestration, RAG Pipelines, Multimodal AI
- **Cloud & Infrastructure:** AWS EC2, S3, CloudFront, HLS Streaming, cPanel
- **AI-Assisted Development:** Vibe coding workflows, Antigravity IDE, VS Code with AI coding assistants
- **Tools:** Git, Docker, Postman, Linux

ACHIEVEMENTS

- Presented research paper 'Performance Analysis of Machine Learning Algorithms for Brain Stroke Prediction' at a national e-Conference.
- Developed a custom HLS streaming pipeline using FFmpeg to generate multi-resolution m3u8 playlists, enabling adaptive bitrate streaming and saving the OTT startup from relying on paid third-party video processing services.
- Contributed to AI training workflows for image preference datasets through large-scale annotation, evaluation, and quality review processes.

EDUCATION

- **Scaler** – Specialization in Data Science & Machine Learning (2025)
- **MCA** – Asansol Engineering College (2023) | CGPA: 8.93
- **BCA** – Asansol Engineering College (2021) | CGPA: 8.59
