PROFILE

AI Engineer specializing in building multimodal AI systems and LLM-powered applications. Experienced in prompt engineering, NLP workflows, LLM orchestration, and integrating speech, vision, and text models into scalable AI applications using Python, Flask, React, and AWS infrastructure. Comfortable working with AI-assisted development workflows using modern agent-based IDEs such as Antigravity and AI coding assistants integrated with VS Code.

WORK EXPERIENCE

AI Training Associate (Freelance) – iMerit | Remote | 2025 – Present

- Worked on the Nidra Image Preference Workflow (WF10) supporting AI training datasets.
- Performed image classification and preference tagging based on detailed client guidelines.
- Evaluated visual content and assigned ratings to ensure dataset consistency and quality.
- Used Ango annotation platform for tagging, search, and dataset labeling.
- Participated in guideline review sessions, training modules, and production readiness assessments.
- Maintained accurate productivity reporting via Worksuite timesheet tracking.

AI / Backend Developer (Freelance) – VIVLY OTT Platform | 2025 – Present

- Designed backend architecture for a cloud-based OTT streaming platform.
- Configured AWS infrastructure using EC2 for compute services and S3 for scalable media storage.
- Integrated CloudFront CDN for optimized global video distribution.
- Implemented adaptive HLS streaming pipeline for efficient playback across devices.
- Managed deployment, SSL configuration, and domain setup using cPanel hosting environment.

Data Science Intern – Feynn Labs | Remote | Jul 2024 – Sep 2024

- Developed analytical dashboards in Tableau and Excel for client reporting.
- Implemented RFM modelling to identify high-value customer segments.
- Managed datasets exceeding 50k records while maintaining data quality.

Python Developer Intern – Techplement | Remote | Jun 2024 – Jul 2024

- Automated Excel-based reporting tasks using Python.
- Integrated APIs to improve data processing workflows.

PROJECTS

Rem-AI – Local Multimodal AI Assistant (Python | Flask | React | Ollama | Whisper | LLaVA)

- Built a local-first multimodal AI assistant supporting text, voice, and image interactions.
- Implemented LLM orchestration using Ollama with Dolphin-Llama3 for conversational AI.

- Added vision capabilities using LLaVA for image understanding.
- Implemented RAG pipeline using web search for contextual responses.
- Developed ChatGPT-style React interface with streaming responses and Markdown rendering.
- Worked with NLP-based conversational workflows and response optimization techniques to improve contextual relevance and interaction quality.

Nexoraid – AI Chat Companion App (Kotlin | Jetpack Compose | OpenRouter)

- Developed Android AI chat application with multiple AI personas.
- Implemented prompt engineering for role-based conversational flows.
- Integrated OpenRouter models for conversational AI.
- Added Text-to-Speech playback for AI responses.

STREAMFORGE – OTT Streaming Platform Infrastructure (AWS | EC2 | S3 | CloudFront | HLS)

- Designed cloud-based video streaming pipeline for OTT delivery.
- Configured AWS EC2 instances for backend services and media workflows.
- Implemented scalable media storage using AWS S3.
- Integrated AWS CloudFront CDN for optimized global content delivery.
- Built adaptive HLS streaming architecture for efficient playback.

TECHNICAL SKILLS

- **Programming:** Python, SQL
- **Frameworks:** Flask, Django, Streamlit
- **AI & LLM Systems:** Prompt Engineering, LLM Orchestration, RAG Pipelines, Multimodal AI
- **Cloud & Infrastructure:** AWS EC2, S3, CloudFront, HLS Streaming, cPanel
- **AI-Assisted Development:** Vibe coding workflows, Antigravity IDE, VS Code with AI coding assistants
- **Tools:** Git, Docker, Postman, Linux

ACHIEVEMENTS

- Presented research paper 'Performance Analysis of Machine Learning Algorithms for Brain Stroke Prediction' at a national e-Conference.
- Developed a custom HLS streaming pipeline using FFmpeg to generate multi-resolution m3u8 playlists, enabling adaptive bitrate streaming and saving the OTT startup from relying on paid third-party video processing services.
- Contributed to AI training workflows for image preference datasets through large-scale annotation, evaluation, and quality review processes.

EDUCATION

- **Scaler** – Specialization in Data Science & Machine Learning (2023 - 2025)
- **MCA** – Asansol Engineering College (2021 - 2023) | CGPA: 8.93
- **BCA** – Asansol Engineering College (2018 - 2021) | CGPA: 8.59
